

Blaze destroys apartment

No cause has yet been determined for a stubborn blaze which broke out in a house at 16 John Street East in Bradford last Tuesday.

The Bradford Fire Department was called out at about 4 p.m. to quell the blaze which broke out in a back apartment, occupied by Dick Gullinger.

Fire Chief Harold Boyd said the whole apartment was in flamed by the time the firefighters arrived on the scene, and there was no hope of saving it.

The back wall of the house was also badly damaged, and thick smoke made the

rest of the house uninhabitable for the occupants of the other two apartments, John Faria Jr., and Louis Dasiba.

"It was a tough one to put out," Chief Boyd said, explaining there were many false ceilings in the old house which had to be torn away to get at the flames.

The chief estimated it took about three hours to put the fire out. The occupants managed to remove most of their belongings during the blaze, and there were no injuries. There has been no estimate of damage.
